

**ERASMUS+ SMALL-SCALE PARTNERSHIP PROJECT  
WOMEN, FAMILIES, CAREERS - DIGITAL SOLUTIONS IN ADULT LEARNING  
FINAL CONFERENCE - 25TH JULY 2024**

**RESULTS OF THE “WOMEN, FAMILIES, CAREERS - DIGITAL SOLUTIONS IN ADULT LEARNING”  
PROJECT**

**ILDIKÓ MODLÁNÉ GÖRGÉNYI, HEAD OF RESEARCH  
ANDREA FERENCZI PRESIDENT, PROJECT MANAGER  
MÓNICA MODLA, MEMBER OF THE RESEARCH TEAM**

**ASSOCIATION FOR WOMEN’S CAREER DEVELOPMENT IN HUNGARY**

# Digital environment

- Continuously developed at the level of the European Union, and also at the level of partner countries.
- An agreement on the Cyber Solidarity Act in the EU in March 2024.
- A high-level cyber security measure was implemented throughout the European Union in 2023, which all member states must comply with by October 2024.
- Has changed over the period of the project.

# Applications

- Their number in the partner countries and in the world has grown explosively.
- We divided it into areas. The project contains 28 areas, the determinants of which are:
  - the European trends at the start: green, healthcare, finance
  - European Parliament, “Digital Life Spaces: Opportunities and Challenges” part 2023, super applications, artificial intelligence, etc.
  - previous AWCDH research, studys on work-employment topics
  - suggestions from the partners

# Guide methodology prepared for the implementation of the task:

- Background documentation
- Guidelines for the collection of digital applications
- Exchange of digital applications, highlighting good practices

# Project results for users 1.

## Guidelines for using the Collection of Digital Applications:

- Introduction to learning how to use applications
- Using the Collection of digital applications
- Users' devices: a computer, an iOS device, an Android device, some basic troubleshooting steps for app download
- Practical steps

# Project results for users 2.

## Collection of Digital Applications for Women and Families:

- The digital background in the European Union and in the countries of the partner organizations (Digital Compass, Digital Economy and Society Index, Measuring basic skills, Women in Digital Scoreboard)
- The role and place of applications in family life can vary, and may be influenced by many factors. Some points to consider: Communication and contact, Shared activities, Managing family things to do, Education and learning, Health and safety, Access to information, Work and productivity, Entertainment and leisure
- Some recommendations for staying digital safe: Discussion and trust, Rules and restrictions, Awareness and education, Control of mobile applications, Rights and responsibility
- Software error caused during the update by "blue death"

Areas of applications	Number of selected areas		
	Hungary	Czech Republic	Slovakia
	Association for Women's Career Development in Hungary	Business & Professional Women CR Z.S	Združenie podnikateliek a manažérok
<b>1. Visual, creative applications:</b>	6	5	4
<b>2. Social media applications:</b>	8	6	5

# Some interesting features of the collected applications 1.

1. Visual, creative applications used by almost all three countries
2. Social media applications: Facebook, LinkedIn, Instagram, Tiktok, Twitter, Pinterest used by all three countries
3. Applications of Google, Microsoft, Apple for office, business and e-mail services, used by almost all three countries
4. Entertainment applications: YouTube, Zoom, used by almost all three countries

## Some interesting features of the collected applications 2.

5. Communication and contact applications: Skype, Messenger, used by all three countries
6. Applications for administration, used by all three countries
7. Governmental applications for the digitization of state administration were only in the Hungarian collection

## Some interesting features of the collected applications 3.

8. Form filling application, this was nominated only by Hungary, even though it is an important area, there has been no development in other countries, users are not interested

9. Transportation applications, Waze, all three countries use it, but each country has its own

## Some interesting features of the collected applications 4.

10. Work and employment applications, used by all three countries
11. Environmental protection applications, there is a lack of this, this is the future, must be developed
12. Eating applications, Hungarians in particular have a lot
13. Sports applications, only few indicated
14. Applications to help learning, used by all three countries

## Some interesting features of the collected applications 5.

- 15. Applications of energy production and storage, only Hungary indicated, however this is the future
- 16. Applications for the agriculture, Hungary has many types, elsewhere only one
- 17. Healthcare applications, used by all three countries

## Some interesting features of the collected applications 6.

**18. Financial applications, used by almost all three countries**

**19. Applications of business life, very few are used**

**20. Applications of online games are only in English language**

# Some interesting features of the collected applications 7.

- 21. Tourist applications, used by all three countries
- 22. Travel Applications, Booking, used by all three countries
- 23. Electronics, it is barely listed by the countries

## Some interesting features of the collected applications 8.

24. Green applications, there is few of them

25. Dating application, it was found only among the Hungarians

26. Online shopping used by all three countries

## Some interesting features of the collected applications 9.

**27. Personal data protection application, hardly used**

**28. Emergencies applications, hardly used**

# Summary of the selected application collection

Its use depends on the individual preferences.

What we need right now,

What are our interests?

People often use apps that their friends or family members also use.

The operating systems (iOS, Android, etc.) and the platforms (mobile phone, tablet, computer) also influence which applications we can access.

Our project helps the spread of applications and the digital transition.
